### ABOUT THE ORE OF NATURAL HAZARD SCIENCE

- **For everyone:** Articles are written for anyone wishing to expand their knowledge, from a student just starting out in their studies to a researcher needing background in a related field
- **Content you can trust:** Each article is rigorously peer-reviewed, so you can be assured that the information is accurate, unbiased, and up-to-date
- **The latest insight:** Articles are updated by experts to ensure content reflects new insights
- **Freely accessible until April 2019:** After a successful free period during development, this Encyclopedia will be available via subscription

### ABOUT THE PROJECT

With today's overabundance of information, and misinformation, students and researchers alike can be overwhelmed in identifying what's trustworthy, what's up-to-date, and what's accurate. Oxford University Press has invested in the **Oxford Research Encyclopedias** to meet this challenge. Working with international communities of scholars across all fields of study, we are developing new comprehensive collections of in-depth, peer-reviewed summaries on an ever-growing range of topics.
